1. Features

Maybe the lightest headset available on the market with less than 200 grams.

Advanced reverse noise canceling technology, reduce 90% background noise. Noise canceling special use 50mm drive, whole pieces forming corona diaphragm for crystal clear high-quality voice.

Operation mode optional: ANR mode / common mode.

Full cover cap design, high quality gel, anti-fatigue for long time wearing.

a) Getting started

Fitting your headset is the key to comfortable use and the superior Active noise reduction (ANR) of the ET-007. A solid seal around your entire ear and a symmetrical fit across the top of your head are necessary for you to experience peak performance from the ANR feature. The following steps will assist you in achieving the proper fit:

- Extend the slider fully
- Place the headset on your head and compress the slider slowly on each side until the head pad rests
 - Softly on the top of your head
- Adjust the ear cups to ensure the ears are fully inside the ear seal and there is uniform pressure on your head

Adjust correctly the ear seals to avoid disturbing noise. The microphone can be rotated to be placed on the right or left side of the headset.

To adjust the microphone placement, rotate the microphone from its base and bend the flexible boom. For clear communication, the microphone should be placed approximately 3mm (1/8 inch) from the lips.

b) Battery type

The ET-007 requires two AA (LR6) batteries.

Use Alkaline batteries from trusted brands for best performance. Rechargeable batteries are not recommended since they provide an uneven voltage power which interferes with the active noise redactor. Your Eternitytime ET-007 will continue its basic operation (hearing and transmission) on a passive noise reduction basis without batteries.

c) Battery life

A set of brand new Alkaline batteries can provide up to 48 hours of operation. However, the exact duration depends on the amount of noise reduction required in your environment. To maximize battery life, turn off the ANR function when the headset is not in use.
